PROJECTS

TechStore Retail Management System

2026

Business Analysis, UI/UX Design, Business Process Modeling — Academic Project

- Analyzed business requirements for a multi-role retail management system supporting customers, store operations, warehouse management, and internal administration.
- Studied retail business operations and identified functional requirements across sales, inventory, warehouse, promotion, and administration processes.
- Conducted stakeholder analysis and created user stories to clarify business requirements and user needs.
- Designed Functional Decomposition Diagram, Business Flow Diagram, Use Case Diagram, Activity Diagram, Sequence Diagram, and Data Flow Diagram to support requirement analysis and business documentation.
- Modeled and refined business workflows including order fulfillment, promotion approval, inventory distribution approval, and inventory management processes.
- Analyzed information flows and role-based authorization requirements to improve the logic and efficiency of inventory distribution workflows.
- Conducted user journey mapping and business process documentation to support requirement analysis activities.
- Designed user flows and interface concepts in Figma to support key business processes and improve user experience.

MD NAD Landing Page

2026

Personal Project

- Designed a responsive landing page in Figma and created user-focused layouts to improve usability and engagement.

EXPERIENCE

NAD Production

2025 – 2026

Content Production Collaborator

- Participated in content review and feedback activities for promotional media projects.
- Contributed ideas and feedback through collaborative discussions with the production team.

EDUCATION

Ho Chi Minh City University of Education (HCMUE)

Bachelor of Information Technology (Expected 2027)

GPA: 3.2 / 4.0

CERTIFICATIONS

- [Design User Experiences with Figma \(LinkedIn Learning\)](#)
- [UX/UI Design for Landing Pages: Tell an Original Story \(Domestika\)](#)
